

Junior Solar Sprint (JSS) is funded by the Army Educational Outreach Program (AEOP) and managed by the Technology Student Association. JSS is a competition in which 5<sup>th</sup> – 8<sup>th</sup> grade students apply scientific understanding, creativity, experimentation, and teamwork to design, build, and race solar electric vehicles. Using the TSA event guidelines format, the JSS program is designed to support the instruction of STEM in categories such as alternative fuels, engineering design, and aerodynamics. Students have the opportunity to participate in Junior Solar Sprint through TSA chapters and Army-hosted locations across the country.

---

**Type of volunteers needed:** Organizations/companies to partner with local army bases

**Location:** Across the United States

**Date:** Spring 2020 (various dates)

**Time needed:** 6-8 hours
