Students from Across the Country Attend the First Ever Virtual National TSA Conference

June 28, 2021

More than 5000 middle school and high school **Technology Student Association (TSA)** members from across the country participated in the virtual 2021 National TSA Conference.

"Together Towards Tomorrow," the conference theme, reflected TSA's 43rd year of work to promote personal development, leadership, and education and career opportunities in science, technology, engineering, and math (STEM) through intra-curricular activities, competitions, and other programs.

For the 2020-2021 school year, TSA adapted over 60 in-person STEM competitive events to accommodate a virtual environment in response to the Covid-19 pandemic. The national conference competition began virtually in early May and ended on June 21st. National top ten competition finalists were announced during virtual conference general sessions, held June 23rd, 24th and 25th.

In addition to being involved in competitions, conference participants engaged in presentations from STEM speakers in education and industry, elected the 2021-2022 national TSA officers, and learned the names of award and scholarship recipients.

Sean Kuehn, 2020-2021 National TSA President shared, "TSA members from across the country rose to the occasion of competing in a virtual environment. Whether participating individually or as a team, students showed skill and expertise in areas such as Architecture and Construction Technology; Communications Technology; Computer Science and Information Technology, Leadership; and Manufacturing and Transportation Technology. The very successful 2021 national TSA conference was made possible by all who contributed to, and participated in, its competitions and activities, and it will be remembered in TSA history."

_____

The 2022 National TSA Conference, "Discover Your Journey," will be held June 26-30 at the Gaylord Texan Resort in Dallas, Texas.

Follow TSA on Facebook, Instagram, and Twitter and bookmark TSAweb.org for more information. More than 250,000 TSA members across the United States are "learning to lead in a technical world." All TSA activities correlate to the Standards for Technological Literacy as set forth by the International Technology and Engineering Educators Association (ITEEA).
